Innovative Products

**Another Innovative Product by Lorenz!
Lorenz Slide Gate (SG2)**

**New SlideGate Design!
Better Seal, Cleaner, Lighter, Shorter**

At **Lorenz** our quality team is proud to announce design changes to our Slide Gate resulting in performance improvements!

The newly designed Lorenz Slide Gate (SG2) features 3/8" thick top & bottom flanges for improved sealing capability by achieving increased pressure on the seals with greater torque on the plates. This also allows the Slide Gate to be Air Purged providing a fully pressurized body.

The new design is a "cleaner gate" with no side ledges to collect material. Fewer fasteners make it simpler to maintain and the lighter design means it is easier to handle and install. The shorter design saves space in tight quarters.

Lorenz continues to offer two-week standard delivery times on the Slide Gate. Our company motto is, "We deliver what we promise on time every time!"

Lorenz manufactures a full line of products ideal for pneumatic conveying and bulk handling systems. Our diversity allows prompt attention to your custom requirements.

Visit www.lorenz.ca to view the entire line of **Lorenz** products.

2-Way "ST"
Inlet Diverters

Tube and Pipe Bends

Couplings

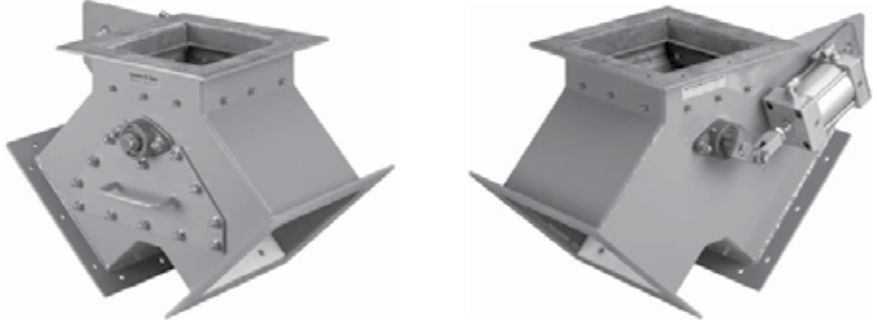

Cyclones

Lorenz Strategy - C.A.P.S.
Customization
Accurate Timely Delivery
Personalization
Single Source Solutions
 Our strategy is to work together with our clients to identify their needs by acting as a consultant advisor & manufacturer specialist.

Product Spotlight

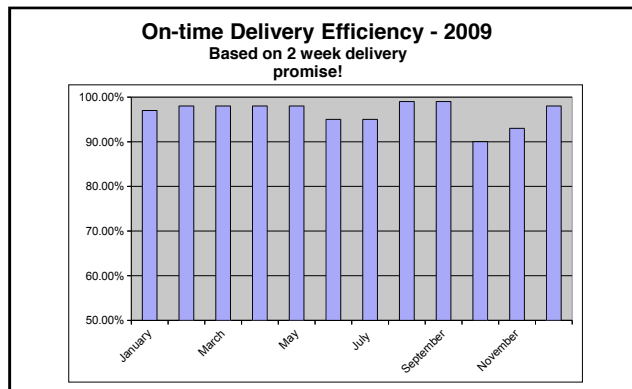

2-Way Aggregate Diverter Valve Series "J"

Standard Features

- Sizes from 6" to 24"
- Heavy duty carbon steel construction
- Standard magnetic piston cushioned air cylinder
 - 45 degree off leg standard
- Access door for maintenance and inspection of valve
 - Solenoids and position switches

On Time - 98%
Industry Leading 2 Week Delivery

Quick Release Tube & Pipe Couplings!

- Especially for use in bulk handling, vacuum or pneumatic conveying lines requiring frequent access
- Handle has positive lock that will not "pop" off during vibration
- Patented handle stays with coupling
- No tools required !
- 100% Stainless Steel Construction
- Thick 3/16" Neoprene Gasket
- Drawn together by contraction rather than expansion which allows greater torque
- Black Neoprene and White Nitrile (Food Grade) Gaskets Standard (Silicone & Viton available upon request)®
